AVAILABLE UPDATES

ENDNOTE X6

X6.0.2 FOR MAC OS X (RELEASED 25 JAN 2013)

- Install the X6.0.1 for Mac OS X Update, if you have not already done so. (Not sure? From within EndNote, go to "EndNote X6" menu > About EndNote to see your version number on the right side.)
- [Download and unzip the Update.](#) **MAC OS**
- Double-click on the "EndNote X6.0.2 Updater" file.
- ALTERNATELY: If you have problems installing the patch, you can instead install the full X6.0.2 version. Using this method, your product key will be required for installation.
- NOTE: If you do not see the EndNote tools in Word after updating, in EndNote click "EndNote X6" and choose "Customizer". Ensure the Cite While You Write component is checked and press "Next" until the process has completed.

X6.0.1 FOR MAC OS X (RELEASED 14 NOV 2012)

- [Download and unzip the Update.](#)
- Double-click on the "EndNote X6.0.1 Updater" file.
- NOTE: If you do not see the EndNote tools in Word after updating, in EndNote click "EndNote X6" and choose "Customizer". Ensure the Cite While You Write component is checked and press "Next" until the process has completed.

X6.0.1 FOR WINDOWS (RELEASED 7 NOV 2012)

- In EndNote, click "Help" and choose "EndNote Program Updates". -OR-
- [Download the Update](#) (Note: this is a .zip file that contains the .msp patch installer). **Windows**
Double-click the MSP file to begin the update.
